

* Distance of a point from plane.

$$\boxed{w^T x = 0}$$

$$\boxed{d = \frac{w^T S}{\|w\|}}$$

$$\Rightarrow w^T S = \|w\| \|S\| \cos \theta = +ve$$

$>90^\circ$

$$d' = \frac{w^T S'}{\|w\|} \Rightarrow w^T S' = \|w\| \|S'\| \cos \theta = -ve$$
