

* Types of CROSS VALIDATION :

- I. TRAINING our model
- II. Hyperparameter Tuning

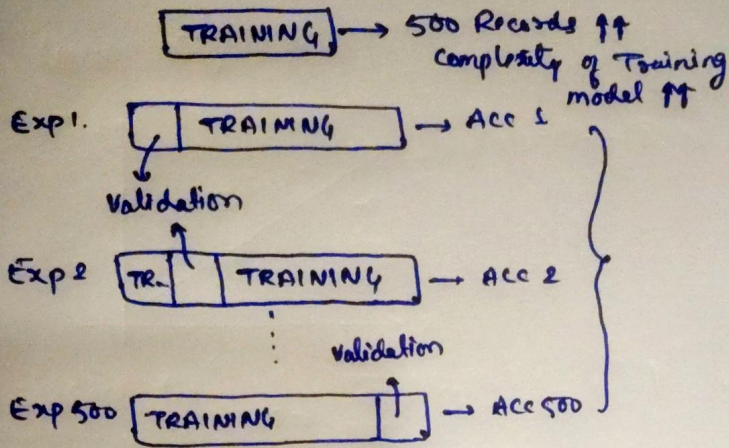

To check the performance of model

CROSS VALIDATION

Random State

85% 92% 78%

1. Leave One Out CV (LOOCV)

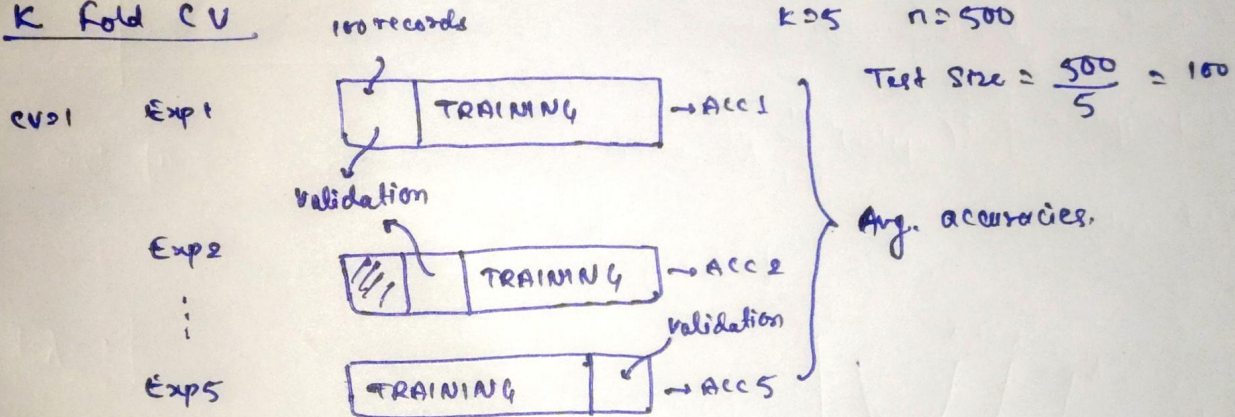

2. Overfitting → TRAINING ↑ ACC
Validation ACC ↓↓

TRAINING → NEW TEST DATA → ACC ↓↓

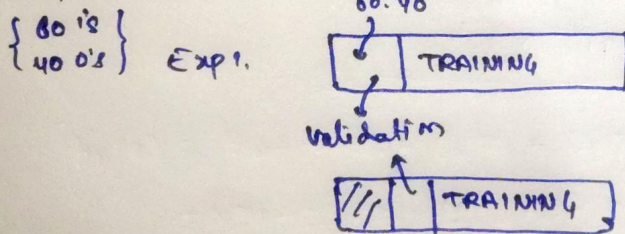

11. Leave P out CV : P = 10, P = 20, P = 30

Note : Every this is same as LOOCV

111. K Fold CV

1111. Stratified K fold CV

K = 5 n = 500

Test Size = $\frac{500}{5} = 100$

↑
Validation data.

for Binary Classification

11111. Time Series CV
